InDex Pharmaceuticals Holding AB (publ)

The crucial pieces of the puzzle in place for the start of phase III

PERIOD JANUARY-MARCH 2021

- Net sales amounted to SEK 0.0 (0.0) million
- Operating loss amounted to SEK –9.3 (–24.0) million
- Result after tax amounted to SEK –9.3 (–24.0) million, corresponding to SEK –0.02 per share (–0.10) before and after dilution
- Cash flow from operating activities amounted to SEK –8.5 (–21.9) million
- Cash and cash equivalents at the end of the period amounted to SEK 532.5 (104.6) million
- Number of employees at the end of the period was 7 (7)
- Number of shares at the end of the period was 532,687,650

All comparative amounts in brackets refer to the outcome during the corresponding period 2020.

SIGNIFICANT EVENTS DURING JANUARY-MARCH 2021

- The Board resolved on a fully guaranteed rights issue of approximately SEK 533 million
- InDex's rights issue was oversubscribed and the company received approximately SEK 488 million net

SIGNIFICANT EVENTS AFTER THE REPORTING PERIOD

No significant events have occurred after the reporting period

OTHER EVENTS

 InDex entered an agreement for services with global clinical research organization (CRO) Parexel Biotech for the phase III study CONCLUDE

"It has been an intensive beginning of 2021 for InDex, where the crucial pieces of the puzzle for the start of phase III now have fallen into place", says Peter Zerhouni, CEO of InDex Pharmaceuticals.

InDex is a pharmaceutical development company focusing on immunological diseases where there is a high unmet medical need for new treatment options. The company's lead asset is the drug candidate cobitolimod, which is in late stage clinical development for the treatment of moderate to severe ulcerative colitis – a debilitating, chronic inflammation of the large intestine. InDex has also developed a platform of patent protected discovery stage substances, so called DNA based ImmunoModulatory Sequences (DIMS), with the potential to be used in the treatment of various immunological diseases. InDex is based in Stockholm, Sweden. The company's shares (ticker INDEX) are traded on Nasdaq First North Growth Market Stockholm. Redeye AB is the company's Certified Adviser (+46 8 121 576 90 or certifiedadviser@redeye.se).

CEO statement

It has been an intensive beginning of 2021 for InDex, where the crucial pieces of the puzzle for the start of phase III now have fallen into place. In February, we completed a successful rights issue of approximately SEK 533 million. The subscription ratio amounted to as much as 153 percent and more than 99 percent was subscribed for by exercise of subscription rights. HBM Healthcare Investments and Handelsbanken Funds came in as new large owners in the rights issue. These are two internationally recognized and successful life sciences specialists that chose to invest significant amounts, which not only strengthens the ownership base, but also constitutes a strong validation of the potential of InDex.

The rights issue will primarily fund the important initial induction study in a sequential phase III program with cobitolimod for left-sided moderate to severe ulcerative colitis. The results of this induction study will constitute a significant value inflection point and the remaining program can be optimised according to the outcome of the study. We estimate that the study will take 18 to 24 months to complete from initiation.

The study, which has been named CONCLUDE, will be a global study with approximately 400 patients at a few hundred clinics. The primary endpoint, clinical remission, will be measured at week 6. Apart from the dosing 250 mg x 2, which was the highest dose and the one that showed the best efficacy in the phase IIb study CONDUCT, cobitolimod's excellent safety profile allows to also evaluate a higher dose, 500 mg x 2, in an adaptive study design. This higher dose has the potential to provide an even better efficacy than what was observed in the CONDUCT study.

With the financing in place, we entered into an agreement for services at the end of March with Parexel Biotech for the

phase III study. After the successful collaboration in CONDUCT, we are very pleased to collaborate once again with them as our clinical development partner. They are a leading global CRO with considerable experience managing phase III studies in inflammatory bowel disease, which will ensure an efficient execution of CONCLUDE. The clinical study must now be approved by the authorities of each participating country. The goal is to start the study in the second quarter of 2021, but it is subject to the development of the Covid-19 pandemic if authorities and healthcare providers will be able to prioritize the start of new clinical studies in the near future.

On June 3 we have the annual general meeting in InDex, but unfortunately there will not be a physical meeting this year either due to the pandemic. I will present the company at Redeye Growth Day the day before the annual general meeting, on June 2, for those who want an update. I will also present the company at Erik Penser Bank tomorrow, on May 6. You can follow the presentations live or watch them afterwards on our updated website.

I would also like to highlight the recent annual report for 2020. It provides a good overview of ulcerative colitis, cobitolimod, the phase III design and the company in general. Strong stories like our patient interview with 23-year-old Felicia confirm the need for new effective and safe treatment options for ulcerative colitis.

I look forward to a continued eventful year with the start of the phase III study CONCLUDE as the next important milestone.

Business overview

INTRODUCTION

InDex is a pharmaceutical development company focusing on immunological diseases where there is a high unmet medical need for new treatment options. The company's lead asset is the drug candidate cobitolimod, which is in late stage clinical development for the treatment of moderate to severe ulcerative colitis – a debilitating, chronic inflammation of the large intestine. InDex has also developed a platform of patent protected discovery stage substances, so called DNA based Immuno-Modulatory Sequences (DIMS), with the potential to be used in the treatment of various immunological diseases. InDex is based in Stockholm, Sweden. The company's shares are traded on Nasdaq First North Growth Market Stockholm.

COBITOLIMOD

Cobitolimod is a potential new medication for patients with moderate to severe ulcerative colitis. Ulcerative colitis is a chronic disease caused by inflammation of the colon. Today, about two million people in Europe and the United States suffer from ulcerative colitis, a disease that has a major impact on the patient's quality of life. Ulcerative colitis is characterised by blood- and mucus-mixed diarrhea, frequent stools, pain, fever, weight loss, and anemia. Patients also have a significant elevated risk of developing colon cancer. Most commonly, ulcerative colitis debuts between 15 and 30 years of age and most patients require lifelong medication. Despite the currently available drugs on the market, many patients with ulcerative colitis still suffer from severe symptoms, and current therapies can cause serious side effects. For those patients that do not respond to medical treatment, the last resort is to surgically remove the colon.

Cobitolimod is a local treatment with a novel mechanism of action. It is a so-called Toll-like receptor 9 (TLR9) agonist that can provide an anti-inflammatory effect locally in the large intestine, which may induce mucosal healing and relief of the clinical symptoms in ulcerative colitis. Cobitolimod is administered via the rectum using an enema allowing a rapid onset of action without systemic exposure and off-target effects.

Cobitolimod met the primary endpoint in the phase IIb study CONDUCT and demonstrated an outstanding combination of efficacy and safety. Data from four previous completed placebo-controlled clinical trials support the efficacy and safety demonstrated in the CONDUCT study. Given the outstanding combination of efficacy and safety, InDex is now advancing cobitolimod into phase III, which is the final stage of development before application for market approval.

Based on the sales of recently launched products, as well as the company's proprietary market research and analyses, including the addressable market described above, the annual global peak sales at a successful commercialisation of cobitolimod are estimated by the company to have the potential to reach more than USD 1 billion.

Phase III study - CONCLUDE

Based on guidance from FDA and EMA, InDex is planning a sequential phase III program with two induction studies and a one-year maintenance study with patients that have responded to cobitolimod as induction therapy.

The important initial induction study CONCLUDE will include approximately 400 patients and the company estimates that it will take 18 to 24 months to complete from initiation. CONCLUDE is a randomised, double-blind, placebo-controlled, global phase III study to evaluate cobitolimod as a novel treatment for patients with moderate to severe left-sided ulcerative colitis. The primary endpoint will be clinical remission at week 6. Apart from the dosing 250 mg x 2, which was the highest dose and the one that showed the best efficacy in the phase IIb study CONDUCT, the phase III study will also evaluate a higher dose, 500 mg x 2, in an adaptive study design. This higher dose has the potential to provide an even better efficacy than what was observed in the phase IIb study.

When a sufficient number of the participants in the study have been randomised and have eligible data for the primary endpoint, an interim analysis will be performed in a blinded fashion to select the best dose of cobitolimod and the other dose will be dropped. Following the blinded interim analysis, the additional patients to be randomised into the study will receive only the best dose of cobitolimod or placebo. Patients responding to cobitolimod in the induction study will be eligible to continue in a one-year maintenance study, where they will be treated with either cobitolimod or placebo.

InDex has entered into an agreement for services with the leading global clinical research organization (CRO) Parexel Biotech for the phase III study CONCLUDE. Parexel Biotech has considerable experience managing phase III studies in inflammatory bowel disease. Parexel Biotech was the CRO that InDex successfully collaborated with in the phase IIb study CONDUCT. The clinical study must now be approved by the authorities of each participating country.

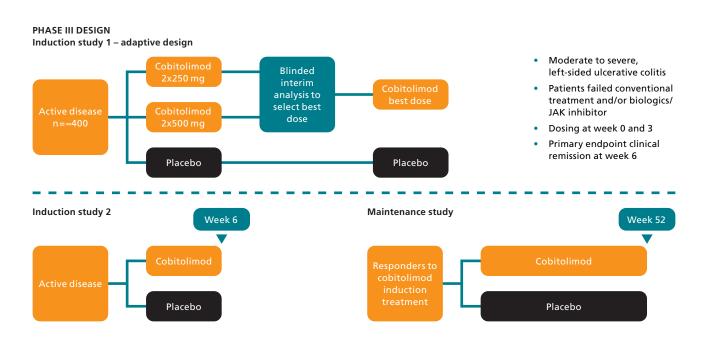

Oral formulation of cobitolimod

InDex has developed a prototype of a novel formulation of its lead drug candidate cobitolimod for oral administration, with targeted drug substance release or delivery to the lower part of the gastrointestinal tract and thus again avoiding systemic exposure. The capsule is a potential follow-on product to the current topical formulation. An oral therapy makes it possible to deliver cobitolimod to parts of the gastrointestinal tract which are inaccessible to an enema and could be more convenient for patients.

This opens the possibility to broaden the therapeutic use of cobitolimod to also include pancolitis and Crohn's disease, where the inflammation can be located higher up in the gastrointestinal tract. The oral formulation development also provides the opportunity to secure additional patent protection for cobitolimod.

OTHER DIMS

InDex has, besides cobitolimod, a preclinical portfolio of more than 150 DNA-based ImmunoModulatory Sequences (DIMS). The DIMS candidates are oligonucleotides that differ in sequence and length but are all TLR9 agonists. DIMS mimic bacterial DNA, without being harmful, and stimulate immune cells to produce beneficial anti-inflammatory cytokines that will help to dampen inflammation. This opens opportunities for the treatment of different inflammatory conditions, in which the immune responses are imbalanced. To capitalise on the substantial historical investments in the DIMS portfolio and to take advantage of the expertise and experience built up during the development of cobitolimod in ulcerative colitis, InDex is testing a selected number of DIMS candidates in models of other inflammatory diseases. Positive signals have been observed, and InDex is now confirming these early results with alternative and complementary methods in order to be able to select a DIMS substance for further development.

SIGNIFICANT EVENTS DURING THE REPORTING PERIOD

- On January 14, 2021 the Board announced that they had, with the support of the authorisation from the extraordinary general meeting held on January 12, 2021,
 resolved on a rights issue of approximately 444 million
 shares at a subscription price of SEK 1.20 per share. The
 rights issue was fully covered by subscription undertakings
 and guarantee commitments from existing shareholders
 and new investors, including amongst others HBM
 Healthcare Investments, Handelsbanken Funds, Linc and
 Fjärde AP-fonden.
- InDex announced on February 9, 2021 that the subscription ratio in the rights issue amounted to 152.6 percent.
 Guarantee commitments made in connection with the rights issue were thus not utilized. InDex received, through the rights issue, approximately SEK 488 million after deduction of costs related to the transaction. 99.1 percent of the rights issue was subscribed for by exercise of subscription rights and 0.9 percent of the rights issue was subscribed for without subscription rights.

SIGNIFICANT EVENTS AFTER THE REPORTING PERIOD

 No significant events have occurred after the reporting period.

OTHER EVENTS

InDex announced on March 30, 2021 that the company
has entered an agreement for services with global clinical
research organization (CRO) Parexel Biotech for the
phase III study CONCLUDE. The study will evaluate the
efficacy and safety of the drug candidate cobitolimod
for the treatment of moderate to severe left-sided
ulcerative colitis.

Financial overview

FINANCIAL SUMMARY FOR THE GROUP

Because of the nature of the business operations, there may be large fluctuations between different periods.

FINANCIAL DEVELOPMENT DURING JANUARY-MARCH 2021

Net sales for the period January to March 2021 amounted to SEK 0.0 (0.0) million. The net sales previous year were related to the sale of DiBiCol test kits up to September 30, 2020. Sale of DiBiCol test kits was then terminated.

Other operating income SEK 0.0 (0.0) million refers to grant received from Vinnova.

Operating expenses for the period amounted to SEK 9.3 (24.0) million. The decrease is attributable to lower costs for phase III preparations compared to the costs previous year for the phase IIb study CONDUCT and costs for manufacturing of study drug.

The operating expenses during the period refer to costs for phase III preparations and general operating expenses.

Costs for the personnel during the reporting period amounted to SEK 2.5 (2.2) million. The increase is partly related to general salary increase.

Cash and cash equivalents as of March 31, 2021 amounted to SEK 532.5 million, which is SEK 478.7 million higher than as of December 31, 2020. The Swedish Companies Registration Office recorded the completed rights issue of 443,906,375 new shares on February 11, 2021. The subscription price was set to SEK 1.20. InDex received approximately SEK 488 million after deduction of the transaction related costs for financial and legal services and for costs for registration and practical management.

FINANCIAL SUMMARY AFTER THE REPORTING PERIOD

The covid-19 pandemic affects the healthcare systems and the investor sentiment globally and must be taken into account in the company's strategic planning. The Board, however, assess that there is no impact on the company's financial position as of March 31, 2021 due to events after the reporting period.

EXPECTED FUTURE DEVELOPMENT

The Board is reviewing the forecasted cash flow on an ongoing basis to determine InDex's capital requirements and resources required to conduct the business activities in accordance with the strategic direction decided by the Board.

It is the assessment of the Board that InDex has enough capital to finance all financial commitments InDex has for the coming 12-month period.

InDex provides no financial forecast or similar forward-looking statement.

Parent company

The net sales amounted to SEK 3.5 (2.9) million during the period January to March 2021 and consisted of invoicing of group wide expenses to the other companies within the group.

The operating expenses amounted to SEK 4.3 (3.9) million and consisted of personnel expenses and other operating expenses relating to the administration of InDex.

FINANCIAL SUMMARY

INCENTIVE PROGRAMMES

At the annual general meeting held on April 20, 2020 it was resolved to issue 3,965,000 warrants to transfer to employees and other key persons within InDex. The warrants had an exercise price of SEK 20 per share and can be exercised during May-October 2023. The Board allocated in July 2020 958,388 warrants to employees and other key persons that were purchased for SEK 0.2522 per warrant. A total of 13 employees and other key persons were offered to subscribe for warrants and 12 of these individuals subscribed for their full allotment.

After the completed rights issue the exercise price and the number of shares that each warrant represents have been recalculated in accordance with the applicable terms. The new exercise price amounts to SEK 7.804 and each warrant entitles the holder to subscribe for 2.5627 shares. The remaining warrants have been terminated.

Notes

NOTE 1 GENERAL INFORMATION

This interim report includes the parent company InDex Pharmaceuticals Holding AB (publ), Corp. Reg. No. 559067-6820, the subsidiary InDex Pharmaceuticals AB and the sub-subsidiary InDex Diagnostics AB ('InDex', 'the company' or 'the group'). InDex Pharmaceuticals Holding AB (publ) is a parent company registered in Sweden with its registered office in Stockholm with the address Berzelius väg 13, 171 65 Solna, Sweden.

Unless otherwise stated, all amounts are in thousands of Swedish kronor (SEKk). Figures in parentheses refer to the comparative period.

NOTE 2 ACCOUNTING POLICIES

InDex applies International Financial Reporting Standards (IFRS) as adopted by the EU. This report is prepared in accordance with IAS 34 Interim Financial Reporting and the Annual Accounts Act. The parent company prepares financial reports in accordance with the Swedish Financial Reporting Board's recommendation RFR 2 Accounting for Legal Entities and the Swedish Annual Accounts Act.

Applied accounting principles and calculation methods are the same as in the annual report for 2020.

None of the IFRS or IFRIC interpretations that have yet to come into legal effect are expected to have any significant impact on InDex.

RISKS AND UNCERTAINTIES

OPERATIONAL RISK

There is no guarantee that InDex's research and development will result in commercial success. There is no guarantee that InDex will develop products that can be patented, that granted patents can be retained, that future inventions will lead to patents, or that granted patents will provide sufficient protection for InDex's products.

There is no guarantee that InDex will obtain the necessary approvals to conduct the clinical trials that InDex would like to conduct, or that the clinical trials conducted by InDex, independently or in collaboration with partners, will demonstrate sufficient safety and efficacy to obtain necessary regulatory approvals or that the trials will lead to pharmaceuticals that can be sold on the market. It cannot be excluded that the regulatory approval process will require increased documentation and thereby increased costs and delays in projects or lead to projects being shut down. Increased development costs and longer development time

may mean that the risks of a project increase and that the compound's potential to successfully reach the commercial stage decreases or that the time for patent protected sales is reduced.

FINANCIAL RISK MANAGEMENT

InDex may also need to raise additional capital in the future. Both the size and timing of InDex's possible need for capital in the future depend on several factors, including the possibility of entering into collaboration or licensing arrangements and the progress made in research and development projects. There is a risk that the necessary financing of the operations is unavailable at the right time and at a reasonable cost.

For a detailed description of significant risks, refer to InDex's annual report for 2020. The annual report is available on the company's website.

NOTE 4 IMPORTANT ESTIMATES AND JUDGEMENTS

The group makes estimates and assumptions about the future. The resulting accounting estimates will, by definition, rarely correspond to the actual results. The assumptions and other sources of estimation uncertainty where there is a significant risk of material adjustment to the carrying amounts of assets or liabilities within the next financial year are outlined below.

(i) Accrued costs for clinical trials

At each balance sheet date, management estimates the proportion of the coming milestone payments that have been accrued. The accrual for accrued costs is based on external parameters coupled with management's estimate of percentage of completion.

(ii) Tax loss carry-forwards

Deferred tax assets related to loss carry-forwards or other future tax deductions are recognised to the extent it is probable that the deduction can be offset against future taxable profits. Since the group does not report positive results no deferred tax asset related to loss carry-forwards has yet been recognised.

(iii) Estimates and assessments linked to development costs.

An important assessment in financial reporting refers to the point in time for capitalizing pharmaceutical development costs. Based on the accounting policies set out under note 2 in the annual report for 2020, no pharmaceutical development costs meet the criteria for capitalisation and have therefore been expensed. Pharmaceutical development costs will be, at the earliest, capitalised after positive results have been achieved in phase III clinical trials or until registration studies have commenced. The reasons being that before that time, it is too uncertain whether the costs will generate future economic benefits and that financing of the asset's completion has not been secured.

NOTE 5 RELATED PARTY TRANSACTIONS

No related party transactions have occured from a group perspective.

InDex Pharmaceuticals Holding AB invoices InDex Pharmaceuticals AB overall group functions.

NOTE 6 EARNINGS PER SHARE

Earnings per share is calculated by dividing the result for the period by the weighted average number of outstanding ordinary shares during the period.

InDex had potential ordinary shares in the form of warrants. However, these did not give rise to any dilution effect in 2020 or 2021 as a conversion to ordinary shares decreases loss per share.

SEK million	Jan-Mar 2021	Jan-Mar 2020	Full year 2020
